

BoH

Budget on Scale of 1 - 15

15

Did nothing for flu shots

Self-funding

Should look at long-term sewer solution in Long Lake area.

Ira is not a fair person (out of control)

Protect our water

Overly restrictive

Does not need more people --just better ones

I want municipal sewer.

Consistency of rule application would be good.

We moved to Littleton 4 yrs ago. Our real estate agent told us that the town administration was very supportive of home owners. We have not found this to be the case. Construction near our house and its impact on our property was not considered. It seems like certain contractors are allowed to waive Board of Health, etc rules and it makes us distrustful of those officials who were elected to protect our interests.

People are afraid of dealing with the Board of Health

An Embarrassment, unprofessional

Insignificant to budget.

Linda is very helpful - The Board is not

Faster Septic Approvals

Need Board in charge not the clerk.

Careful, but slow

They should stick to health - their job is not zoning. House size (growth issues)

Very satisfied

Board of Health does not return phone calls

This is a very important service

Not up to date process

Difficult to work with

Most of these categories depends upon issues at hand concerning needs vs like to have . . .

No response re: neighbors feral cats & trash

Part time hours/help not responsive

They should publish school air quality not let school contro it & thy lied to OSHA about asbestos in ceiling tiles at R.S.

This board does not work well with towns people

Harmful to Town

Believe they have more power than they do.

5 if possible

Linda & Ira were both very helpful and informative

Anti Business

Infexible+overly restrictive

One of the best boards in town

Very slow with results

It needs no comment if you have ever tried to work with them.

Become more used friendly

Need new members - all have own agenda

Abutters never notified about rescheduled Title 5 Meetings

Too slow

Approval of questionable septic plans

Need to work in a coordinated way

There should have been better communication of ecoli in water

Don't know what they do

difficult to work with

Should have Town Sanitarian
