H1N1 Priority List

As issued by Massachusetts Department of Public Health:

Vaccine Update

In addition to the original priority groups, the state is now starting to provide vaccine for people up to the age of 64 with underlying health conditions. This will occur:

- 1) by providing vaccine to clinical sites who serve people at very high risk due to their medical conditions, and
- 2) by allowing local public health officials to vaccinate adults with underlying health conditions if they feel they have adequately vaccinated the original target groups of pregnant women, children and front-line health care workers.

If you are a member of a target group, there are several ways you can stay informed about the availability of H1N1 vaccine in your community:

The H1N1 clinic scheduled for December 8, 2009 will comply with this update.

Reminder:

The clinic will be held at the Littleton High School on December 8th from 4:00 p.m. until 8:00 p.m.

To expedite the process please complete the H1N1 Vaccine Administration Record and Screening forms
