To whom it may concern.

Tree Replanting.

I was advised that the tree replanting ratio is 2:1. I am planning on purchasing trees and shrubs from Wagon Wheel. Due to the limited area, I am planning on planting four Emerald Green Arborvitae which will reach 10 to 15ft tall and 3 to 4ft wide at full maturity. Also, I will plant two Endless Summer Hydrangeas that reach 3 to 5ft tall and 3 to 5ft wide at maturity and two Red Sprite Winterberry Holly. The Red Sprite Winterberry Holly can reach 3 to 5ft tall and 3 to 5ft. wide. The trees and the shrubs will be planted in the areas in between the trees that need removal. These areas are marked in red ink. I will clear and level the area before I plant the trees and the shrubs.

Respectfully, submitted

Elias Makrigianis
