**Subject: Withdrawal Request of the Stormwater Permit Application
242 King Street
Littleton, MA 01460**

Dear Maren and Board Members:

Our office has obtained the approved drainage design materials done by CDM Smith for LELWD on the Wastewater Treatment Site. GPR reviewed the results with James Thorne, PE of Green, and both the Planning and Conservation staff members. The previously approved stormwater management design accounts for the impervious areas proposed and existing. This includes the residential structure at 242 King St. James Thorne and your staff agree the impervious surfaces and associated runoff are accounted for, especially with the removal of additional impervious materials on the site.

GPR has revised the Site Plan without the ponding area for review by the Conservation Commission. A copy of the plan has been provided to the Planning Board as well.

At the suggestion of Maren, GPR as representative of LELWD proposed activities for the residential structure hereby request the withdrawal of the Stormwater Permit Application filed October 9th, 2025. We can be available for discussion if desired at your next meeting. A copy of the revised plan is attached for your files.

Sincerely, *Bruce D Ringwall, Pres.*
