**\*\*THIS EMAIL WAS SENT BY AN EXTERNAL SENDER\*\***

To the Littleton Planning Board,

I am writing in support of SpringDell Farm's request to take a small parcel of their farm land to be used solely for the composting of natural materials and topsoil (which will eventually help with long term farming). I understand that another, competitor farm next door is the main objector to this plan and I'm certain the Planning Board of Littleton will not be fooled by this move to try to thwart competition.

I also understand that the Town of Littleton put into place a bylaw listed as "Accessory use for active farms", likely to curtail overdevelopment. This request by SpringDell fits exactly in this bylaw.

I do not live in Littleton. As a matter of fact, I live in a town with its own active farm community but I CHOOSE to drive 20 minutes out of my way once a week to buy the superior products at SpringDell Farm. And while I'm driving into Littleton, I'm also frequenting other Littleton businesses.

Please allow SpringDell to make this addition to their business in order to preserve this beautiful farm that is such an asset to Littleton and surrounding communities.

Best,
