Subject: SpringDell Farm support

****THIS EMAIL WAS SENT BY AN EXTERNAL SENDER****

Hello,

I am writing in support of Jamie Cruz and her request for a permit to accept yard waste for composting at SpringDell Farm as part of the plan to reclaim soil for planting.

I have lived in Littleton for 6 years and in that time have seen several housing developments built in town on what was formerly open land. Allowing SpringDell Farm to accept yard waste and process stones and stumps pulled from the soil will allow SpringDell Farm to continue providing their neighbors with a variety of vegetables for our own use during the growing season, and preserve an important piece of farm land; keeping Littleton's agricultural heritage alive in a time when more and more development is swallowing our former farms. I believe that any concerns raised regarding traffic or noise from the operation can be addressed by Jamie in a manner that would cause minimal disruption for all parties involved and that any inconvenience caused by the new operation would be more than offset by the benefits of increased farmland in our town. Please support Jamie and SpringDell Farm in this endeavor and help save Littleton's farmland!

Thank you,
Susan Monaco
