**Subject:** In support of Springdell Farm

\*\*THIS EMAIL WAS SENT BY AN EXTERNAL SENDER\*\*

Dear Maren,

I am writing in support of Springdell farms application for a special permit for accessory use. I understand it is to expand non-food composting to increase and fortify their farmed land as well as expanding a landscaping business. Springdell farm has been feeding me and my family since I moved to Littleton nearly a decade ago. They are an amazing part of this community and give local food and meat. This is a fantastic environmentally friendly and sustainable way to feed the community, reducing the need for packaging and transportation to a grocery store. To support the farm that has been here for generations, I wholeheartedly support their plans for innovation and expansion of the farm.

I am not sure what else to say except based on the way they grow their food and try to be a strong community member offering family friendly activities as well as community agriculture, I have no doubt their efforts would minimize the impact on the surrounding area and neighbors. Personally I would love to be their close neighbor!

Sincerely,  
Christina Riordan
