Re: Annual Report – 571 Great Road – SpringDell Farm Accessory Business Uses at Active Farms

Dear Sir or Madam:

We are writing to you to provide an annual report on the operations being conducted at 571 Great Road under our special permit for accessory business use at active farms. All conditions provided in the permit have been followed and met. We have operated within the time restraints outlined, provided, and maintained adequate access to structures and composting areas for fire service equipment, and we have not received any complaints from abutters. Composting operations have met all State and Federal guidelines, including maintaining all compost piles at a minimum of 75 ft from any property line.

During the 2023 calendar year, we did not conduct any rock crushing operations. Preliminary reclamation involving removal of rock shown across phases 1-4 is outlined on the attached aerial map (shaded in blue). A small area (approximately 1.25 acres) between the existing pond and access road was fully reclaimed for agricultural production this year is also shown (shaded in yellow). Currently, there is approximately 4500 CY of raw, leaf compost, 1000 CY of screened compost, 4500 CY of raw loam, and 3500 CY of screened loam on site for continued reclamation in 2024.

If you have any further questions, please do not hesitate to reach out at the contact information listed below.

Kind Regards,

A handwritten signature in blue ink, appearing to read "Amanda Mirfield".
