I was able to visit this site yesterday and confirm that the proposed work is outside of Conservation's jurisdiction.

There was a ConCom RDA from 1984 but no associated plan. My best guess is their work is more than 100 feet, but someone should confirm B&Cs 2024 delineation. I can't confirm where they show the floodplain on the plan, but the proposed work is well out.

Wetland line looks obvious on aerial photo, so if we get approval (Tim) might be able to take a look even with the snow???
