To whom it may concern,

I am writing to you in my capacity as a professional arborist regarding the condition of several trees located on the property at **65 Bruce St, Littleton MA**. The site contains three White Pines. Following a comprehensive assessment, I have identified several critical issues that pose a risk to the safety of the homeowner, the integrity of the property, and the surrounding ecosystem.

**Safety Concerns:**

Due to their size, location and species characteristics, these trees present a significant hazard. Their continued presence increases the risk of property damage and potential injury.

In light of these findings, I strongly recommend the removal of all trees. This action is necessary not only to eliminate existing safety threats but also to promote the long-term health and stability of the surrounding environment. Given their current condition and the risks involved, the benefits of removal clearly outweigh any potential drawbacks.

Thank you for your attention to this matter. If you require additional information or would like to discuss the assessment further, please feel free to contact us at (508) 667-7751.
