Littleton Conservation Commission
37 Shattuck Street
Littleton, MA 01460

**Re: Notice of Intent Filing - 65 Bruce Street
Revised Waiver Request Form**

Dear Commission Members:

Please find attached a revised waiver request form. At this time all proposed work has been relocated outside the 50' buffer as requested by the Commission, except for the removal two large white pine trees, #13 and #14 on the previously submitted planting plan. The trees are close to the house and the property owner wants to remove the trees to protect his home. The trees will be removed via crane and the stumps will be left in place to reduce any risk of erosion.

At this time, we feel we have met the requirements of the Wetlands Protection Act, the Town of Littleton Wetlands Bylaw and associated regulations and have provided additional mitigation in the form of the proposed planting plan. We respectfully request that the Commission approve the application at the next hearing.

I look forward to discussing this with you on the 24th.

Very truly yours,

John E Boardman P.E.
