Crestview Road, Littleton, MA
Site Plan #L-13668 (Progress Print, dated 12/11/19, Sheet 1 of 3)
D.E.R.A. Project No. 29614

Dear Commission Members and Staff:

Thank you very much for your patience in waiting for an update on this project. Since we last met, we have performed soil evaluation test probes along the hillside where the proposed driveway is located. The attached Sheet 1 of 3 of Site Plan L-13668 (Progress Print 12/11/1) has the soil evaluation test hole data of the recent probes performed as well as the soil evaluation test holes and percolation test results from test performed in 2015 as part of evaluating the site for suitability to sustain a sewage disposal system. Proposed snow stockpile areas, planting areas and grassed swales have been added to the plan which will be describe in more detail at the meeting on December 16, 2019.

In addition, we had Dan Wells, Goddard Consulting, perform an evaluation of the site regarding the hydrology of the hillside and suggestions of mitigation measures for the proposed project. Attached is a copy of his report (Habitat Inspection Report) for your review and consideration.

We look forward to discussing this information in greater detail on Monday night.

Very truly yours,
DAVID E. ROSS ASSOCIATES, INC.
