Preliminary Direct Impact Report

1) Environmental analysis:

The site, designated by the assessors as R07-1-0, is in the southern portion of the town of Littleton, MA. The site is composed of a variety of different soil types ranging from hydraulic soil group B to D. Located throughout the site are Bordering Vegetative Wetlands (BVW) and a stream flows outside the North Western property limit. Due to the various wetland fingers of BVW located on site, work is proposed to be done within the 100’ Buffer, and one wetland crossing is proposed to reach an upland area of development. The work associated with this project will comply with the Wetlands Protection Act as well as the Town of Littleton Wetland Bylaw.

Vegetative coverage analysis
The site consists of a variety of landscapes including wetlands, mature trees, vegetative areas, and open fields. The existing house, 195 Tahattawan Road, will be retained. The intent is to maintain the existing house and associated out structures on a lot. The land to the south and east of the house is mostly meadow with the land sloping from the east to the west. Most of the property to the west and southwest of the house is wooded with a mixed of deciduous and evergreen trees. The property has several ridges that run north south from Hanwood Ave to the rear of the property.

Surface water and groundwater quality and level
The proposed development of single-family homes is subject to the Massachusetts Stormwater Management Standards. Best management practices proposed will include a combination of closed and open drainage in a de-centralized manner. The project will use catch basins, swales, sediment forebays and infiltration basins. Recharge of roof runoff may be used with the aid of infiltration chambers. As outlined in the Stormwater best practices runoff will be treated to remove eighty percent of the Total Suspended Solids (TSS) prior to infiltration or discharge. Domestic waste water will be treated through on-site septic systems design in accordance with the Title 5 and the Littleton Board of Health regulations.

Effects and priority and estimated habitat for rare and endangered species, outstanding botanical features and scenic or historic environs
The subject property is not within any Estimated Habitat for Rare or Endangered Species. This is based upon the most recent mapping on the MASS GIS layer for NHESP. There is a potential vernal pool located just off the subject property to the northeast of the site.

The homestead at 195 Tahattawan Road is old of the older dwellings in Littleton and the surrounding community having been built in the early 1700’s.
Capability of soils, vegetative cover and proposed erosion-control efforts to support proposed development

Based upon the Natural Resources Conservation Service Web Soil Survey, the project site has a wide variety of soil groups. The site includes Canton, Carpenter-Hollis-Rock outcrop complex, Paxton, Woodbridge, Ridgebury, Whitman and Freetown Muck soils. These soils will help direct the design of the septic systems and stormwater management based on their hydrologic group ratings and percolation rates. The type and classification of the soils will also have an impact on the type of best management practices used for the development.

Erosion controls will be used throughout the development during the construction process until the project has been completed and stabilized. These will include Construction entrance(s), siltation barriers, check dams, silt sacks and erosion mats. Through the use of best management practices, the project will protect the resource areas from unintended impacts.

Relationship to the requirements of the Wetland Protection Act

The development of the project will require the filing of a Notice of Intent for a detailed approach to the work within the Wetland Protection and the Littleton Conservation Commission’s jurisdiction. Stormwater management, the access to various dwellings and yard areas will require review and development in harmony with the State and local regulations.

2) Traffic Study (Moderate Project):

Tahattawan Road and Harwood Avenue are two lane roads with posted speed limits of 25 mph in the vicinity of the proposed site access. The proposed Dennis Circle is a short cul-de-sac of about 450± linear feet. The conventional development proposes 9 new lots of single-family development on Dennis Circle. Based on the Institute of Transportation Engineers estimated traffic volumes the peak am, and pm hour appear to generate just under 10 trips per hour.

Based on the Littleton Subdivision regulations the project would be considered a Minor Project. The stopping sight distance for a 25 mph speed limit is 155’. The stopping sight distance at the proposed Dennis Circle is greater than this in both directions.

3) Sanitary Sewer Study:

As mentioned previously the project will have on-site septic systems designed in accordance with the Massachusetts Title 5 and the Littleton Board of Health regulations.

4) Water Study:

Town water exists on both Tahattawan Road and Harwood Road. The project proposes to extend the use of the public water system into Dennis Circle. The applicant and their representatives will contact the Littleton Light and Water Department for their consultation prior to the submission of a definitive plan.

Goldsmith, Prest & Ringwall, Inc.
5) Public Works Cost:

Based upon the outcome of the preliminary subdivision process and the discussions with the Littleton Planning Board and the applicant will determine the direction of a definitive subdivision or other possible type of residential development. Upon that determination a more accurate estimate can be provided.

6) Municipal Service Costs:

Again, upon the determination of the residential development approach based on the preliminary subdivision and discussion a more accurate estimate can be provided.

Meaning and intending to convey all of the “Remaining Land of Alfred F. and Estelle M.
Glavey” so-called, on Tahattawan Road and Harwood Avenue as depicted on said plan.
Containing 43.500 acres of land more or less.

The undersigned hereby releases any and all Rights of Homestead which have been declared in the property or have been granted as a matter of law and further states under the pains and penalties of perjury that there are no other persons entitled to protection under the Homestead Act.

Being a portion of the premises conveyed to Alfred F. Glavey and Estelle M. Glavey, by Deed dated August 29, 1955 and recorded with the Middlesex South District Registry of Deeds in Book 8552, Page 386. See Death Certificate of Estelle M. Glavey recorded herewith.
Executed as a sealed instrument this \underline{6th} day of \underline{February}, 2017.

ALFRED F. GLAVEY

COMMONWEALTH OF MASSACHUSETTS

MIDDLESEX, ss.

\underline{February 6}, 2017

On this day, before me, the undersigned Notary Public, personally appeared the above-named ALFRED F. GLAVEY, who proved to me through satisfactory evidence of identification, which was the presentation of a driver’s license, to be the person whose name is signed on the preceding document, and acknowledged to me that he signed it voluntarily for its stated purpose and who swore or affirmed to me that the contents of the document are truthful and accurate to the best of his knowledge and belief.
